

城市边缘区难题

作者：申兵，中国宏观经济研究院国土开发与地区经济研究所

很多人聚集在城市边缘地区或者叫郊区，这些地区是城市管理比较薄弱的地区。这些地区管理的难点在于城乡混杂，城市有一套城市的管理机制和法规，乡村有一套乡村的管理机制。这些区域相当于两者都不属于的一个地方，所以各种社会问题更多，管理难度更大。从目前来看，那得从很多地方下功夫，比如说居住条件的规定、基础性的一些基础设施的建设和维护、治安的加强，等。总体来看，城市管理下一步的工作得从城区向这些边缘的地方延伸，把这里的各项工作再做得细一点，同时，在机制上也需要加以创新。

Problems in urban periphery

Author: Bing Shen, China Academy of Macroeconomics Research

Many people gather in the peripheral areas of the city, or the suburbs. In terms of governance, these areas (the suburbs) are of relatively weaker base. The challenge of governance in these areas lies in the mixed urban and rural settlements. The city has a set of urban management mechanisms and regulations, and the village has its rural management mechanism. The peripheral areas are controlled by neither urban system nor rural system, so there are more social problems and the management is more difficult. In the light of current conditions, many aspects are required to be improved such as stipulating standards of living conditions, the construction and maintenance of some basic infrastructure, and the strengthening of public security. In general, what may need to be done is to extend the urban management system from central areas to the suburbs, to conduct the work here more carefully, and at the same time, to innovate the mechanism.
